# trusted domain - Troubleshooting Nextcloud

## Troubleshooting

- trusted domain
    - go to: nextcloud/config and edit the config.php
    - find: "trusted_domains" and add the domain you want to trust

```
'trusted_domains' =>
  array (
    0 => 'box.danicus.net',
    1 => '192.168.1.1',    (put in yourown ip address)
```

- **Note:** it's the domain you GO TO to access NextCloud...not where you're trying to access FROM.

## Mobel app

Error message
    "no HTTP connection allowed"
Go to nextcloud config file, config.php and add
`'overwriteprotocol' => 'https', `
