

# trusted domain - Troubleshooting Nextcloud

## Troubleshooting

- trusted domain
  - go to: nextcloud/config and edit the config.php
  - find: "trusted\_domains" and add the domain you want to trust

```
'trusted_domains' =>
array (
  0 => 'box.danicus.net',
  1 => '192.168.1.1', (put in yourown ip address)
```

- **Note:** it's the domain you GO TO to access NextCloud...not where you're trying to access FROM.

## Mobel app

Error message

```
"no HTTP connection allowed"
```

Go to nextcloud config file, config.php and add

```
`'overwriteprotocol' => 'https',`
```
