

trusted domain - Troubleshooting Nextcloud

Troubleshooting

- trusted domain
 - go to: nextcloud/config and edit the config.php
 - find: "trusted_domains" and add the domain you want to trust

```
'trusted_domains' =>  
array (  
    0 => 'box.danicus.net',  
    1 => '192.168.1.1',    (put in your own ip address))
```

- **Note:** it's the domain you GO TO to access NextCloud...not where you're trying to access FROM.

Mobel app

Error message

"no HTTP connection allowed"

Go to nextcloud config file, config.php and add

```
`'overwriteprotocol' => 'https',`
```
