

Install Odoo "Community" on local machine

Odoo 'deb' package uses PostgreSQL. Install that first

```
sudo apt install postgresql -y
```

Repository:

```
wget -q -O - https://nightly.odoo.com/odoo.key | sudo gpg --dearmor -o /usr/share/keyrings/odoo-archive-keyring.gpg
```

```
echo 'deb [signed-by=/usr/share/keyrings/odoo-archive-keyring.gpg] https://nightly.odoo.com/17.0/nightly/deb/./' | sudo tee /etc/apt/sources.list.d/odoo.list
```

Use the usual `apt-get upgrade` command to keep the installation up-to-date:

```
sudo apt-get update && sudo apt-get install odoo
```

After its installed, you will need to start it up.

```
sudo service odoo start
```
