

Install on docker compose

Configure your .yml file like this:

```
version: '3.1'
services:
  web:
    container_name: odoo
    image: odoo:16.0
    depends_on:
      - db
    ports:
      - "8069:8069"
    volumes:
      - /your/local/directory:/var/lib/odoo
      - /your/local/directory:/etc/odoo
      - //your/local/directory:/mnt/extra-addons
    environment:
      - HOST=db
      - PASSWORD=bitchodoo
      - USER=odoo
  db:
    container_name: odoodb
    image: postgres:15
    volumes:
      - /your/local/directory:/var/lib/postgresql/data/pgdata
    environment:
      - POSTGRES_DB=postgres
      - POSTGRES_PASSWORD=bitchodoo
      - POSTGRES_USER=odoo
      - PGDATA=/var/lib/postgresql/data/pgdata

volumes:
  odoo-web-data:
  odoo-db-data:
```
